

# HOW TO MAKE A PAPER ROSE

## MATERIALS

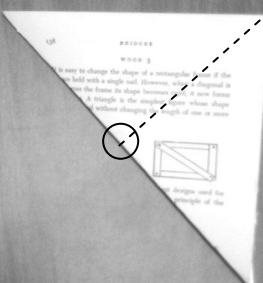

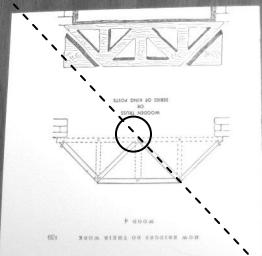

### Makes one (1) Rose:

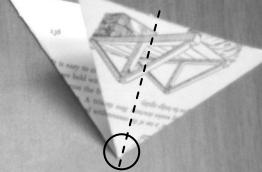

1. Three (3), square pieces of paper
2. One (1) pipe cleaner
3. A glue stick
4. A pair of scissors
5. Tape

# HOW TO MAKE A PAPER ROSE | PAGE 2

1

First Fold

Second Fold

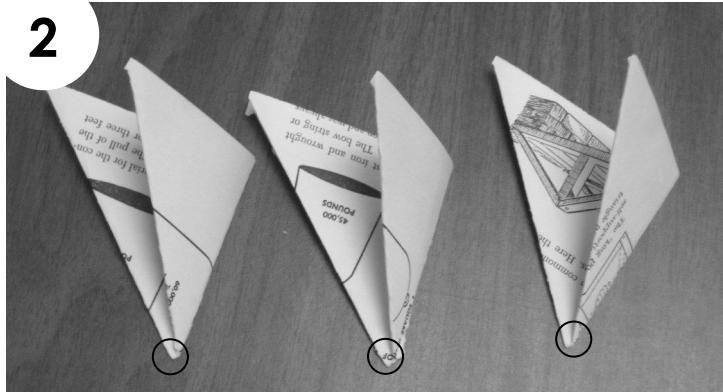

Third Fold

Fold one of the pieces of paper into a triangle, three times (see the dotted lines above)

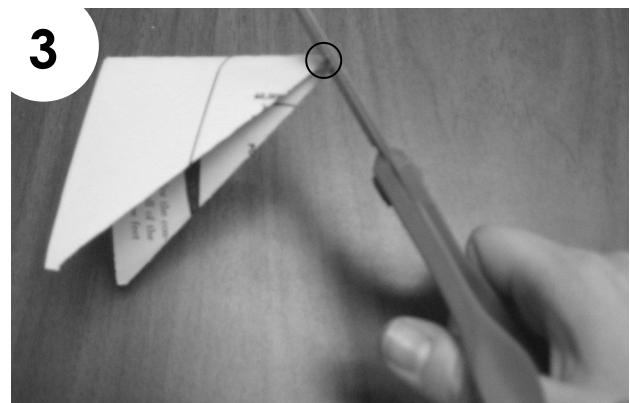

Keep track of the center of the paper (see the black circles)

2

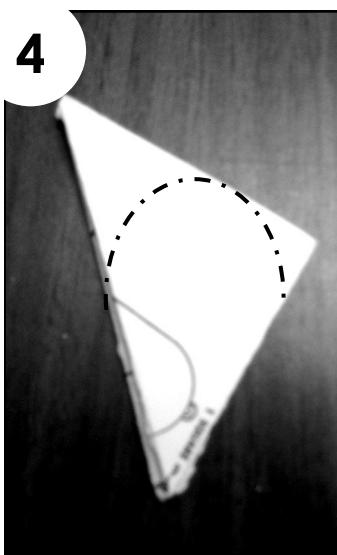

Repeat these folds on two other paper squares  
so you have three folded triangles total

3

Cut off the center tip of the triangle  
**A TINY snip will do**

4

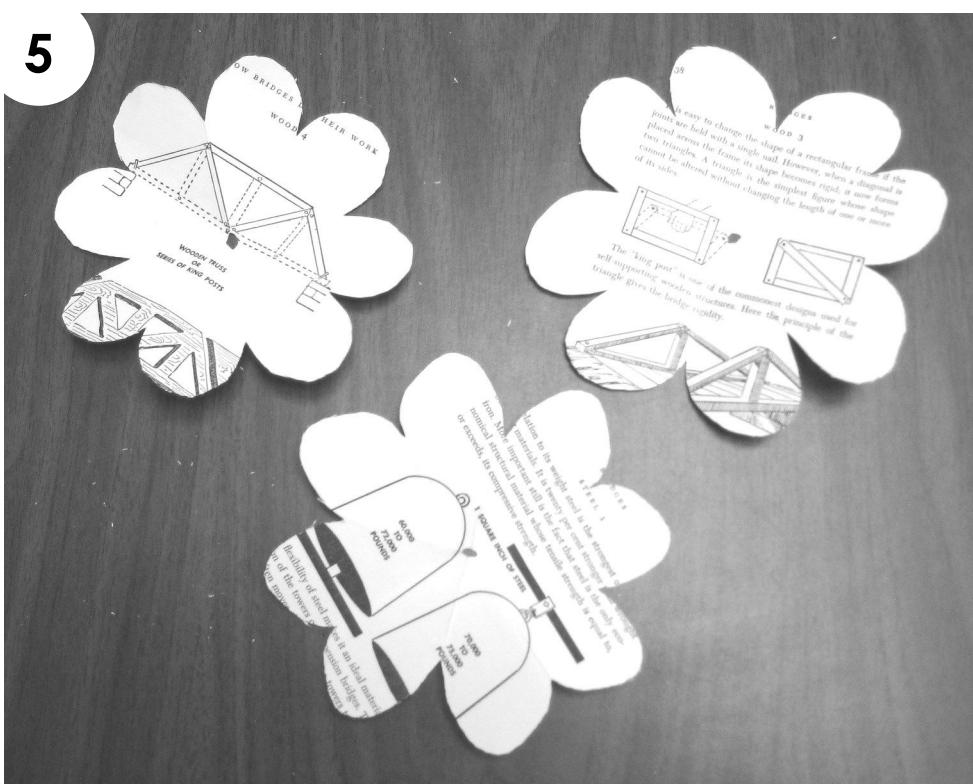

Cut along the dotted line  
(see picture on the left)  
to create the flower petals.  
Optional: get creative with your  
petal shapes here

Repeat for all three folded  
triangles and then open them  
up (see next page)

## HOW TO MAKE A PAPER ROSE | PAGE 3

5

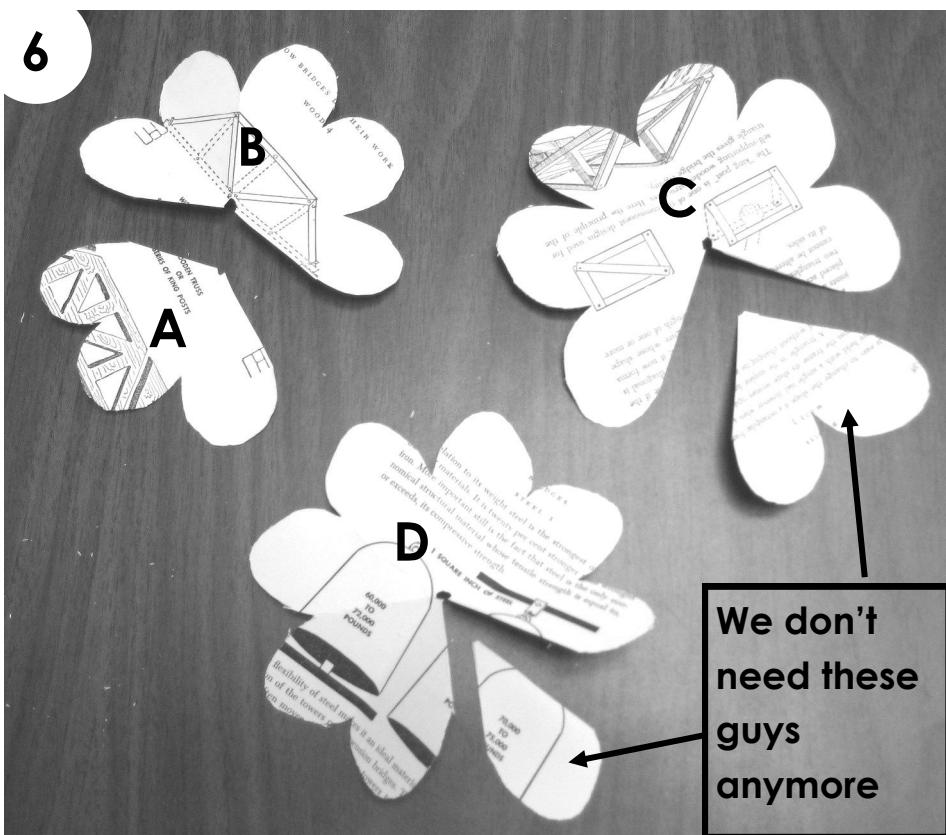

Unfold! At this point you should have:

- \* three, flower-shaped pieces of paper
- \* a small hole in the center of each paper

Don't worry if your petals are not perfect. As long as you see eight individual petals on each paper, you're doing great!

6

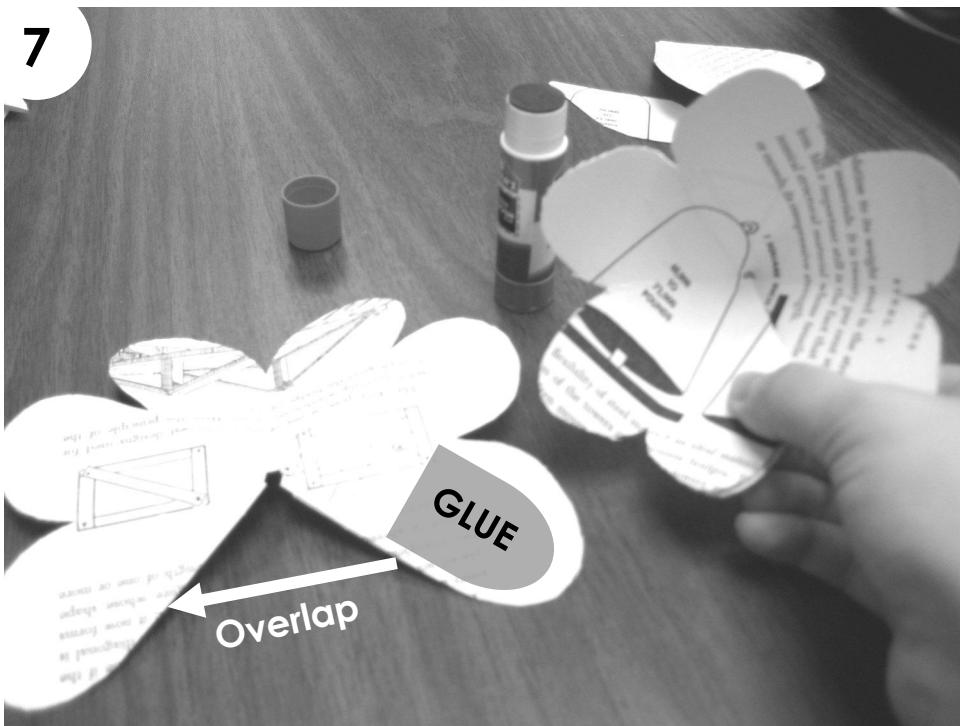

Snip out sections of each petal as shown to the left.

- \* Snip 3 petals out from the first flower (SAVE THIS PIECE)
- \* Snip 2 petals out from the next flower
- \* Snip 1 petal out from the last flower

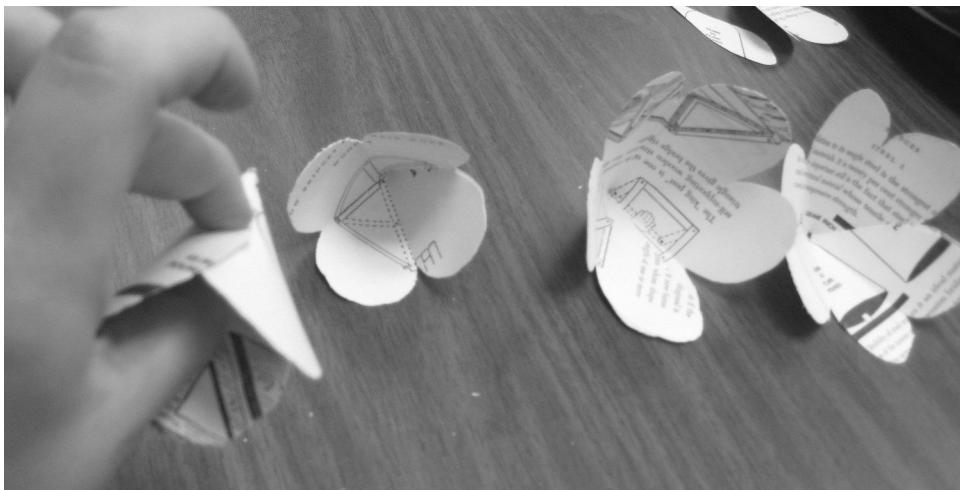

You need the four pieces that are labeled with letters.

7

For the three largest flower pieces (B - D):

Put glue on one of the end petals and stick it to the other end petal.  
(see left)

For the smallest flower piece (A), overlap the two end pieces a little bit with glue; tape together if needed.

You should now have four flower petal cones.

8

Optional:

For a realistic flower look, wrap the end of each petal around a pencil or tooth pick until it is curled.

9

Stack up your petal cones in size order, with the smallest on the inside and the largest on the outside.

Then bend the end of a pipe cleaner, and stick it through the hole in the middle of all of the stacked petals.

**ENJOY YOUR FLOWER!**
